This report contains the results of the DNA examinations, and completes the requested examinations. The submitted items and the probed DNA membranes will be returned under separate cover by overnight mail. In addition to the evidence in the case, any remaining processed DNA from specimens examined by DNA analysis is also being returned. The processed DNA can be found in a package marked PROCESSED DNA SAMPLES: SHOULD BE REFRIGERATED/FROZEN. It is recommended that these samples be stored in a refrigerator/freezer and isolated from evidence that has not been examined.

This is what The district attorney has in his possession, that I can't re-test to compare to my DNA profile, as stated at my trial, that they did an comparison testing to my DNA, I am allowed by law to do the same. Now, can I have an order for DNA testing under: 92601 Act.
